

"The City of Kissimmee recently awarded a \$270,000 contract to GatorSkitch Architects to provide architectural and design services for our new Sanitation Division Building along with other associated improvements at our Public Works Service Center Complex. They have been very responsive and, still on schedule despite numerous changes and modifications due to the site conditions and FAA requirements. Communication between the parties has been excellent. I would recommend them for any similar projects you may have."

*David Derrick
Kissimmee Public Works & Engineering Director

"I would highly recommend GatorSkitch Architects as a full service architectural firm. On our church project, they have been most helpful of our building design. They offer a very professional service and have been very pleasant to work with. We have been very pleased with our association of GatorSkitch Architects and would encourage you to give them an opportunity to work with you on your project."

"I have used GatorSkitch Architects for five projects to date in South Lake County. Their list of responsibilities includes site plans, conceptual drawing and full architectural drawings including M.E.P.'s and artists renderings. Roger is very talented and creative with his designs and concepts. He and his staff are very professional, responsive and are able to complete jobs on time."

October 2007*

"I would recommend GatorSkitch Architects to anyone who needs the services of a highly qualified firm of architects. They have the talents to arrive at exciting, attractive design solutions that meet not only the client's needs, but the client's budget requirements as well. I have been an employer for over 40 years and know the value of concerned, dedicated, knowledgeable and professional people."
